**STYLE DELIVERS COLLABORATIVE WORKSPACE TO HEWLETT PACKARD OFFICES**

In 2020, Hewlett Packard Enterprises relocated to The 210 Building, an inspiring office development in the heart of Winnersh Triangle. Working with architects, Perkins and Will, and BW Construction, Style was specified to create an extensive range of flexible space within the meeting rooms as well as a chic, collaborative working environment.

Using a combination of 52dB Dorma Hüppe semi-automatic Variflex glass moveable walls, 55dB solid semi-automatic Variflex moveable walls and Style's ingenious 'working wall' pivot panels, a supremely flexible and stylish training and meeting suite has been created. Hewlett Packard employees enjoy a contemporary environment with the freedom to rapidly change room configuration as often as required.

**A PROVEN STAINLESS STEEL CLEANER**

Once again, the field of chemistry has produced a product so outstanding, so different, as to revolutionise cleaning and polishing stainless steel.

The Sheila Shine process requires no rubbing or polishing. It is so easy, so simple that it actually makes cleaning a pleasure, with unbelievable results. It removes greasy film, watermarks, resists fingerprints and streaking, and also preserves the surface against deterioration of any kind. Does not contain acid, silicone or abrasive substances. Sheila Shine also produces miraculous results on Formica, porcelain, fibreglass, enamel, plastic, leathers and furniture.

**PERFECTLY MATCHED**

A pedestrian traffic control system that complements automatic doors has been introduced by GEZE UK providing both safety and security.

PACE, Pedestrian Access Control Equipment is a range of speed lanes and turnstiles that offer an efficient control of pedestrians in and out of buildings. More cost effective than manual checks and providing round the clock control in buildings that are operational 24 hours a day, they are ideal for controlling access to any part of a building that requires it, as well as the entrance.

From the simplest, easy to install tripod system for buildings such as leisure centres to the most stylish, highly sophisticated security with anti-tailgating sensors designed for the most demanding government buildings or banking institutes.
