

SPORTS HALL SPACE MAXIMISED WITH STYLE MOVEABLE WALL

The large sports hall in the new £22.5m Whitwick and Coalville Leisure Centre offers considerable functionality thanks to a Dorma HÜppe Variflex moveable wall installed by partitioning expert, Style. Featuring semi-automatic operation with an impressive 59 dB acoustic barrier between divided areas, the wall allows the hall to be quickly separated into two dance and fitness studios or opened up to accommodate activities requiring the entire area. Ensuring a long-term return on investment, the Variflex panels are manufactured separately from the frame, allowing individual ones to be easily changed if they become damaged. This represents a highly cost-effective solution, compared to having the entire moveable wall replaced, and is an essential feature for a busy facility like this where a wide variety of sports are being enjoyed. Finished in a contemporary pearly grey laminate, the Variflex benefits from semi-automatic operation which means, once the wall has been moved into position, the acoustic seals are applied to the perfect pressure every time without the need for manual intervention.
