Event space experts specify Style again

Partitioning specialist Style, recently installed a comprehensive solution for another new etc.venues event facility in Piccadilly, Manchester. This is the eighth time Style has worked with etc.venues and Synergy architects, having previously developed partitioning wall systems for seven prestigious room hire amenities in central London.

A total of nine DORMA Variflex moveable walls were installed, providing exceptional acoustic privacy of 55dB between the divided areas.

Style recommended DORMA Variflex for Manchester as it is a highly adaptable system that can be finished in a wide variety of designs to reflect the etc.venues individual look. "The panels feature a stunning wood

effect laminate," explains Andy Gibson, Style's director for the north. "Spectacular, site-applied graphics of iconic Manchester landmarks complete the design, making for truly eye-catching partitioning walls."

The comprehensive combination of nine DORMA Variflex moveable walls allows room configuration to be quickly and easily changed, creating small meeting hubs as necessary, or opening out the space as required.

An added advantage of Variflex is that the panels are manufactured separately to the frame. Style is the UK's exclusive partner to DORMA.
