Over 300 architects, specifiers, contractors and clients recently enjoyed the official launch party for Style's impressive new London showroom. A provider of operable wall solutions and the exclusive UK partner to Dorma Hüppe, Skyfold and SWG, Style welcomed the prestigious guest list with beer, bubbles and a buffet, whilst demonstrating the very latest moveable wall innovations and flexible space concepts.

Conveniently located in London's Shoreditch, Style shares the showroom with fellow FIS member Optima Contracting, experts in glazed partitioning systems and Atrium, the UK's largest independent specialist lighting distributor.

With all three specialists under one roof, it offers a mouth-watering proposition for anyone involved in the refurb and new build sectors to experience the very latest products in a prime environment.

"We have had a London showroom for over five years now," said Style's group managing director, Julian Sargent, "however, we outgrew the last one and are thrilled to have opened the doors to, what must surely be, the most exciting showcase of moveable wall, glazed wall and lighting solutions in London.

As well as seeing Style's impressive range of movable wall systems in operation at the London showroom, visitors can better experience and understand their acoustic integrity thanks to the installation of a Biamp Apart Sound System. Calibrated to be set at varying decibel levels, the system accurately replicates the noise of people speaking, as might be present during different sized meetings and events.

Furthermore, a Biamp Cambridge Sound Masking System is installed inside the rooms, demonstrating how privacy can be enhanced by removing distractions to improve overall comfort levels.

To book a showroom visit please email london@style-partitions.co.uk or call 020 3752 3838.
